

# Supercharge Your Immunity Against EMFs and Viruses

with Dr. Tracey Diner of Magnetude Jewelry

## What are EMFs and how do they relate to Covid-19?

**EMFs** are electromagnetic frequencies in the air and they can effect your cellular immunity! This is so important right now because our bodys need every defense and artillery to fight off Covid-19.

Everything that uses electricity gives off EMFs, and they are getting stronger, particularly with 5G. We live in a sea of EMFs with Smart Meters, Cell towers, Cell phones, Satellites, Laptops, Microwaves all pulsing EMFs constantly through our body. So what does that mean for your health?

## Our Bodies are Electric.....

The body is made up of billions of electrically charged cells and tissues which can be measured as an electric voltage. Organs like the heart, brain, mitochondria and nervous systems are electrical. When a heart dies we “charge” it with an electric defibrillator, we measure our brain activity with an EEG (Electroencephalogram) and to measure nervous system function in our extremities we measure electrical nerve conduction.

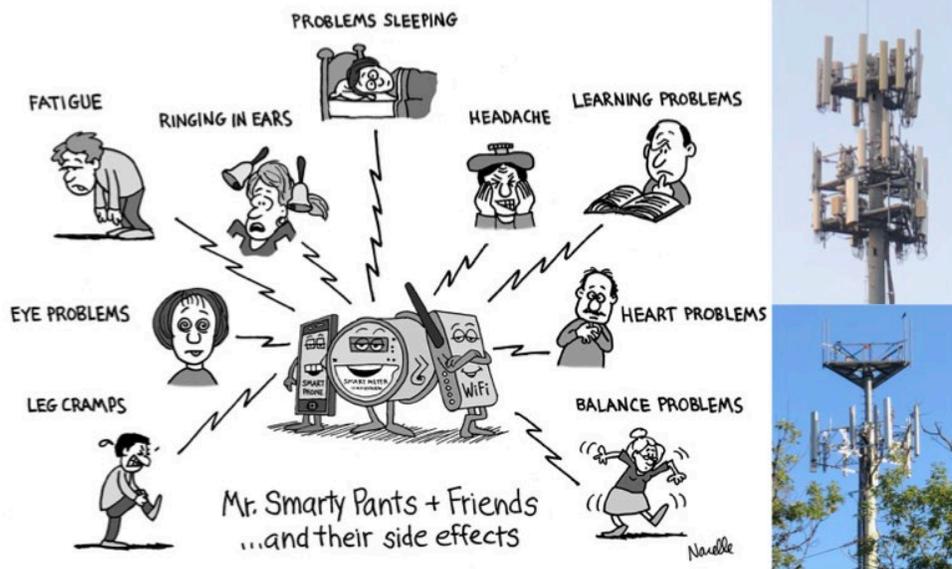

A cell's voltage is an electrical “snapshot “ of its health. Cells that measure **higher voltage** are **healthy** and with good immune function. Cells that measure at a **low voltage** are **dysfunctioning** and can often be seen in people who are ill with poor immune and/or chronic medical conditions.

**Why is this relevant to EMF exposure?**

**EMFs from electronic devices have a detrimental health effect on us!**

As the EMFs penetrate the cells, it effects cellular motion, wearing down the cell's energy voltage and its ability to function. This leads to cell dysfunction, poor health, and possible alteration of the DNA and Mitochondria.

**If you are living on the planet, you are living in a sea of EMFs,  
and everyone should consider some form of protection and mitigation!**

### **Possible Detrimental Health effects from EMFs:**

- Frequent infections due to immunosuppression: viral, fungal, parasitic, bacterial
- Autoimmune reactions, Fibromyalgia, Candida
- Frequent infections due to immunosuppression: viral, fungal, parasitic, bacterial
- Cancer, brain tumors, Leukemia in children and adults
- Poor energy, chronic fatigue
- Headaches, insomnia
- Asthma, respiratory allergies
- Low sperm count, and fertility problems in both sexes.
- Brain fog, inability to concentrate, poor recall and memory

- Increased appetite and cravings for sweets and stimulants (coffee, soda, “energy drinks”)
- Anxiety, panic attacks, depression, irritability
- Hyperactivity, ADD, poor learning
- Rise in free radicals leading to premature aging, cancer, and all chronic diseases
- Damage to cellular physiology, energy production, metabolism, weight gain
- Chromosome and DNA damage
- Destruction of brain cells and imbalance of neuro-transmitters which govern memory, learning, analytical function, creativity, joy, pleasure
- Nervous system feels inflamed
- The same cells are damaged in Alzheimer’s and autism patients.

**The key to EMF protection is to make sure your cellular voltage is kept high**  
 ( See below the solutions and special offer )

EMF does not easily effect cells of someone who is healthy with high cellular-voltage. But for people who have had their cellular energy/voltage continuously robbed and degraded from exposure to EMF (which is everyone on the planet) from Smart Meters, cell towers, cell phones, satellites, and laptops, this can lead to a low cellular voltage individual who may find themselves in an unfortunate downward spiral of poor health that can lead to illness and premature death.

**The answer to overcoming poor health from EMFs is to increase the body’s cellular vitality by increasing the cellular voltage.**

Magnetism and electron flow are intimately related and interwoven, as current science proves that one cannot exist in the absence of the other. *So, when a **strong magnet is placed in the energy field of a person with lowered cellular voltage, the electrical field will also increase. Increasing the magnetic strength also increases the electrical strength.***

**A good preventative maintenance regimen for good health and better vitality would include the following:**

EMF mitigation and protection:

.Keep distance from EMF producing devices like routers, and laptops and cell phones don't have them in rooms where you frequent.

.Don't sleep with your cell phone by your bed or head and don't put your cell phone in your pockets,

.Wear **Magnetude Jewelry** which has the strongest N52 Neodymium magnets available. and right now there is [FREE SHIPPING AND FREE KN95 mask](#) with each order of \$50 or more!

[What else should you be doing to keep your immunity strong?](#)

Drink 8 glasses of water/day which increases cellular hydration and detoxification.

Eat a healthy diet. Get 7-8 hours/ sleep a night. Supplement your diet with good vitamins, and particularly Vit C (1000 mg/day min), Zinc, and D3 (100 mcg/min) a day for immunity!

Visit [www.MagnetudeJewelry.com/DrLaJoyce](http://www.MagnetudeJewelry.com/DrLaJoyce) and see all the *interchangeable beautiful jewelry* that can help you increase your cellular voltage and mitigate the negative effects of EMFs. Make 1000's of beautiful combinations. Because EMFs are around you 24/7, we want you wearing our jewelry all the time. There is jewelry for sleeping without a chain, the Atlas, it pins to your clothing, as well as dog tags for your fur babies too! They are exposed just like you.
